Join a fast-growing, agile and innovative company that is at the forefront of image-guided surgical navigation for dentistry and become a part of the core development team to develop infrastructure and toolchains that improve developer and operational efficiency. Your knowledge and expertise will be used to develop, deploy, and leverage cloud infrastructure for supporting a distributed user base; improve build and deployment infrastructure to streamline software development; develop security and access control policies and architectures for critical resources; and much more. You will interact with software developers, operations, software test and regulatory professionals in a dynamic and challenging start-up environment.

We seek a candidate with the following skills and experience:

- 2+ years of overall technical operations experience
- 2+ years of software engineering experience
- Solid understanding of Unix/Linux operating systems, networking, architecture, and core web technologies (such as DNS, Routing, TCP/IP, SSH, VPN, and Load Balancing)
- Experience managing cloud infrastructure and access (AWS preferred)
- Strong scripting abilities in Bash and Python
- Experience with Configuration Management tools (Ansible preferred)
- Comfortable with git or similar version control
- Experience with Continuous Integration / Continuous Delivery tools and best practices
- Experience running and maintaining real-world build systems (Jenkins preferred)
- Experience with micro services or service-oriented architecture
- Team player with excellent communication skills

Additional desirable skills and experience include:

- Highly developed communication skills (verbal, written & presentation)
- C++ programming experience
- Exposure to running a large-scale 24/7 production environment
- Exposure to Security and Testing frameworks

Position open immediately. Please submit resume and qualifications to info@X-NavTech.com or call 1-855-475-9628 for more information.
